### **Company Overview**

Atlas Mission Systems is a Service-Disabled Veteran-Owned Small Business providing engineering program support, program management services, and geospatial data integration to federal agencies and contractor teams supporting complex infrastructure and operational environments.

The company specializes in supporting organizations responsible for large-scale healthcare systems, federal infrastructure programs, and mission-critical operational environments requiring disciplined program coordination and integrated data analysis.

Atlas Mission Systems supports prime contractor teams delivering federal healthcare infrastructure programs through specialized program analyst support, engineering program coordination, and integrated data analysis capabilities.

---
